- Get it now \$ sudo curl http://repo.pfSense.com/repos/pfSenseFS/repo.key | sudo sh Get your key to get up and running as a Pi. If you do not provide your key, password will not be generated, and you will receive a warning. Enter the path where you saved the key: \$ sudo cryptsetup -f ~/.ssh/id\_rsa.pub -passwd ~/.ssh/id\_rsa.pub This will print you your key's fingerprint, as well as a message telling you if the key was correctly stored. If you have any further questions go to <https://faqs.pfSense.com/> and ask at <https://faqs.pfSense.com/faq/7>.
